SYMPOSIUM INTERNATIONAL SYMPOSIUM

WELCOME ADDRESS

The aim of the contemporary Olympic Movement is to teach the young people of today the means to psychico-somatic katharsis through both strenuous physical excersion and the cultivation of the mind. The Olympian athlete ought to respect himself and his opponents. The spirit of Olympic competition stems from the mutual participation, the competition, the mutual respect, the rejection of any ethnic, social and religious discriminations, and which as a result will lead to similar goals in the struggle for a better life, creating bonds of friendship. In particular, nowadays, at the end of the twentieth century, an era which is characterized by reform and search for a new set of values. Olympism can become the connecting link among these humanistic ideas aiming to a better course in the 21st century.

Being aware that you are working in the sector of the Army, you can promote in the best way possible, the maintenance of peace and to co-operation among people, and we are sincerely welcoming you and wishing you to have a pleasant stay at the I.O.A. residences, in Ancient Olympia.

We are also wishing you a good success in your seminar proceedings.

My best regards.

Nikos FILARETOS,
President of the I.O.A.
