Short explanation of the regulations And CISM Parachuting events.

The program of the World Military Parachuting Championship includes the following events:

1. **Accuracy landing (individual and by teams);**
2. **style (individual);**
3. **formation skydive (by teams).**

1. **Accuracy landing:** athletes' individuals or teams attempt to land from an altitude of 1100 meters above ground level on the centre of a target of 5 cm diameter. At the center of the target pit will be an Automatic Measuring Device of the accuracy landing with dead center disk of a diameter of 3 cm. In case the competitor lands in the center of the target, he scores 0 (0.00 in the center). The distance from the center is measured automatically to a minimum distance of 16 cm.

- **Individual:** individual accuracy consists of 8 qualifying rounds. After completion, the competitor with the lowest total of points (cm- distance) in each round shall be "the World Military Champion in individual accuracy".
- **By team:** after completion of 8 rounds, the best 50% (minimum of 8 teams) will make a ninth round (semi-final). Then, the best 50% (minimum 4 teams) after the semi-final will make a tenth round (final). The team with the lowest total shall be "World Military Champion in team accuracy".

2. **Style:** a jump executed at an altitude of 2200 m above ground level where an individual competitor performs a series of complex maneuvers in free fall. He performs 6 manoeuvres in free fall including 4 rotations in the horizontal plane and 2 rotations in a vertical plane. The event totals 5 style rounds including the final which will be executed by the best 50% after the completion of the 4 first rounds.

The score for a style jump is the time in seconds and hundredths of second to complete the series. The working time starts at the instant the competitor starts the first manoeuvre, whether or not it is the correct manoeuvre.

The competitor with the lowest total shall be "the World Military Parachuting Champion in Style".

- **Individual overall assessment:** the competitor with the lowest score in accuracy and style events shall be "the World Military Parachuting Champion in individual overall".

3. **formation skydive:** jumps executed from an altitude of 3200 meters above ground level by competitors men and women linked together by grips performing a free formation and within block during a working time of 35 seconds. The event totals 6 rounds including the final which will be performed by the best 50% qualified after the semi-final after the completion of the 4 first rounds.

The team with the highest score that is obtained by adding the scores of the team on each of the jumps shall be "the World Military Parachuting Champion in formation skydive".

- **Team overall assessment:** the team with the lowest total of rankings in all three events (accuracy, formation skydive and style) shall be "the World Military Parachuting Champion in Team overall".

The evaluation in individual and by teams is made separately for women and men.
